

ULTRA-AGILE COMMUNICATIONS™

Empowering Remote Users With Comprehensive C31 Capabilities

SATCOM on The Move (SAT-ON-MOVE)

600' Cellular/Satellite Moving Convoy
WiFi Internet Bubble

Easy mobile to fixed communications transition

600' Cellular/Satellite Basecamp
Internet Bubble

Interchangeable deployment options

Separate your communications reliability from your vehicle reliability

CONVOY CONFIGURATION:

Satellite or cellular Internet signal is provided via WiFi to all authorized users within 300' of the moving **SATONMOVE** deployment vehicle, and is accessible during convoy movement.

BASECAMP CONFIGURATION:

Satellite or cellular Internet signal is provided via WiFi to all authorized users within 300' of the **SATONMOVE** deployed at a stationary location. Note: due to inclement weather or related conditions, the **SATONMOVE** may be operated with the lid closed and latched if desired.

FORT COLLINS, COLORADO

SATCOM on The Move (SAT-ON-MOVE)

Auto-acquire mobile BGAN satellite and cellular voice/data Internet service.
Seamlessly interchangeable from moving convoy to stationary basecamp location.

Provide Internet access within your deploying vehicle and to other authorized vehicles travelling within a 300' radius of your vehicle.

Convoy cellular/satellite voice/data support

- » Auto-acquire BGAN voice and data service during vehicle travel
- » Easily share cellular/satellite based voice/data access via WiFi with up to 25 team personnel in the vehicle or nearby convoy vehicles
- » Integrates with our "triple pipe" cellular modem for **triple redundant** cellular/satellite voice/data connections
- » Battery powered for ease of movement between vehicles
- » Effortlessly integrate additional services such as radio interoperability in a mobile package

Basecamp cellular/satellite voice/data support

- » Seamlessly transition from mobile to stationary team voice/data support
- » Auto-acquire cellular/satellite Internet with case lid closed to facilitate inclement weather operations
- » Easily share satellite based voice/data access with up to 25 team personnel in the area
